

BIO-CHEM

INOX-TOP

clean and care product for stainless steel

- INOX-TOP – the new highly efficient specialist product for the cleaning and renovation of matt and polished stainless steel
- removes dust, finger prints, oil, light lime, and rust films
- quick drying of treated surfaces - leaves a firm and shiny protective film
- free of silicone
- protects against new dirt - antistatic effect
- ready to use - simply spray onto surfaces and wipe off - no streak marks
- available as aerosol and in bulk; bulk is not to be marked acc. to EC-directives
- water-based product - free of solvents (aerosol contains propellants)
- etched and printed letterings (signs, labels, panels, boards) on e. g. cooking equipment, elevators, etc. are not affected
- also suitable for use on aluminium, chrome, ceramics, wood, non-ferrous metals, glass and plastics

Facts

order no.	description
A50070	500 ml spray can
A50170	500 ml PET-bottle with trigger
A01070	10 L container
A03070	30 L container
A20070	200 L plastic drum

INOX-CLEAN

Characteristics

BIO-CHEM Inox-Clean is a highly concentrated pasty cleaner especially designed to remove mineral deposits like lime scale and cement, rust as well as slight oil and grease. BIO-CHEM Inox-Clean renews and brightens stainless steel, aluminium and non-ferrous metals without attacking the base material. The pasty cleaner sticks to vertical surfaces, strainers, rolls, etc. This allows a good penetration and a good cleaning effect.

Kind to the environment

BIO-CHEM Inox-Clean contains surfactants that are in line with the EC-guidelines for biodegradability. Furthermore, the product contains neither nitric, hydrofluoric nor hydrochloric acid. The water-based cleaning gel is non-flammable.

Application

BIO-CHEM Inox-Clean is ready to use. Apply with a brush and let it react. The cleaning gel is miscible with water up to 1:40, with addition of water the viscosity decreases. The period of reaction depends on the kind and intensity of soiling. After this period rinse the surface off with water. If necessary use sponge or brush to increase the cleaning effect. BIO-CHEM Inox-Clean is completely miscible with water and can be rinsed off without leaving any residues (according to the Foods and Commodities Law, cleaned surface that come into contact with food should be rinsed with water after cleaning).

A00141	1000 ml plastic bottle
A01041	10 L container
A03041	30 L container
A20041	200 L plastic drum

INOX-CARE

Characteristics

BIO-CHEM Inox-Care is a highly refined pure oil for the care and protection of stainless steel, aluminium and non-ferrous metals. It leaves a softly gleaming protective film on the treated surfaces, that prevents finger marks and other stains. After applying BIO-CHEM Inox-Care, a simple wipe will easily remove new finger marks and stains. This mild protector displaces moisture and protects against weather influences. The oil-base BIO-CHEM Inox-Care is non-flammable and provides a long-term finish during indoor and outdoor storage.

Kind to the user

BIO-CHEM Inox-Care is ready to use. Apply sparingly and evenly by spray or soft cloth onto the surfaces to be protected. Wipe surplus product and polish surface with a cloth.
